The balance sheet and income statement for the year 2024 have been approved by the Audit Committee and the Board of Directors as reported in the annual report. and details of the operating results for the year 2024 have been reported in the 56-1 One Report. We would like to a summarize of the report including the forecast of the business operations in the fiscal year 2025 as follows:

The Chairman informed that on the Fiscal year 2024, In fiscal year 2024, the printer business experienced a decline in demand, leading to a revenue decrease of 1,521 million baht (13.3%) compared to the previous fiscal year. The reason for the decline in demand is the shift to digital technology, as company and consumers concluded that transitioning to digital formats is more cost-effective than printing on paper. For example, replacing paper printing orders with PDF file transmissions contributed to this drop in demand. Additionally, the rising cost of printing paper further led consumers to stop purchasing printers.

In the automotive-related business sector, demand varies depending on the customer. However, for the Smart Key business, sales of Yamaha's higher-priced motorcycle models increased, leading to higher revenue compared to the previous fiscal year. On the other hand, sales related to Car Audio and Panels saw a significant decrease in revenue, resulting in a total revenue decrease of 106 million baht (3.3%) for the automotive-related sector compared to the previous fiscal year.

In the other business sectors, revenue from microwave components exported to China saw a significant decline due to the economic downturn in China. The GTMS business did not slow down significantly but still experienced a slight decrease in revenue.

As a result, the total product sales for fiscal year 2024, combined with the impact of the sudden appreciation of the Thai baht in the fourth quarter, amounted to 13,500 million baht, a decrease of 2,000 million baht compared to 15,500 million baht in the previous fiscal year.

On profitability, in a challenging environment, such as the minimum wage increase of 10 baht from 353 baht to 363 baht in January 2024, along with rising energy and raw material costs, higher living expenses, and increased transportation costs, the company has taken steps to reduce expenses. As a result, the operating profit was 500 million baht, a decrease of approximately 60 million baht from 560 million baht in the previous fiscal year.

Additionally, in the fourth quarter, the US Federal Open Market Committee (FOMC) announced that it would reduce the policy interest rate starting from September. This led to a rapid appreciation of the Thai baht. The TTB exchange rate as of 30 June 2024 was 36.69 baht, but the exchange rate used for financial closing on 30 September was the strongest at 32.12 baht. Over the three months, the TTB rate increased by 4.57 baht, or 12.5%.

Although the Company implemented forward rate measures to manage this, it was unable to keep up with the rapid appreciation of the baht. As a result, the company had to record an exchange loss of 284 million baht, leading to a pre-tax profit of 314 million baht.

Continuing with the report on related party transactions within the group of affiliated companies, the details for fiscal year 2024 are as outlined in the 56-1 One Report, page 30. The sales of products to the parent company amounted to 1,950 million baht, primarily from the sale of Keyless Entry systems for Mazda, a car manufacturer, and Mirrorless Cameras for Canon.

Sales to other subsidiaries amounted to 68 million baht, mostly from the sale of automotive components for export to North America. The purchase value of automotive parts, machinery, equipment, molds, and other items from the parent company was 53 million baht, and the purchase value of IPO parts from the subsidiary, Sima, was 97 million baht. Other items include technical support from the parent company, royalties, and expenses for sending specialists, totaling 226 million baht.

For the planned related party transactions in fiscal year 2025, the sales of Keyless Entry and Mirrorless Cameras to the parent company are expected to reach 2,000 million baht, with sales to other subsidiaries projected at 50 million baht. The purchase value of parts from the parent company is expected to be 10 million baht, and the purchase value of machinery and equipment for improving production efficiency, such as automation machines for the Printer business and inspection machines for Keyless, is estimated at 20 million baht. Additionally, service-related expenses, such as royalties, expenses for sending specialists, and quality control, are projected at 250 million baht

This concludes the report on related party transactions for fiscal year 2024 and the plan for fiscal year 2025. These related party transactions have been reviewed and approved by the Board of Directors and the Audit Committee. According to the transfer pricing audit report prepared by a well-known tax consultancy firm, the transactions, including royalties, are deemed to be "reasonable for transactions with related companies in an economically reasonable manner," meaning the company conducts related party transactions under typical commercial terms.

Under the mentioned - circumstances, in fiscal year 2025

Fiscal year 2025 is expected to be a year in which the global economy will be influenced by the political and economic policy trends of major economic powers such as the United States and China. The aggressive policies of the new president, Donald Trump, including the announcement of tariff measures, the deportation of immigrants, and tax cuts in the United States, as well as the continuous government support in China to manage the slowdown in economic growth, will likely have an impact on the global economy. Additionally, ongoing geopolitical tensions in the Middle East present a risk to the global economy.

In this context, the sales forecast for fiscal year 2025 is set at 15,200 million baht, an increase of 1,700 million baht compared to the 13,500 million baht achieved in fiscal year 2024.

The Printer business is facing difficult sales conditions, and it is anticipated that sales will reach 11,500 million baht, according to the annual promotion plan for fiscal year 2025 from customers.

Moreover, in the automotive-related business, although Audio sales are expected to decline further, the demand for Smart Keys is expected to increase, with revenue projected to reach 2,800 million baht, which is close to the previous fiscal year.

Regarding profitability, considering the planned minimum wage increase to 400 baht in 2025, along with rising energy and raw material costs that are driving up product prices, it is estimated that fiscal year 2025 will see a profit before tax of 660 million baht.

Question from Mr. Parinya Tienworn (Shareholder registration no. 6016682838)

Why has the dividend payout decreased despite having higher profits than in 2023? Does the Company have any investment plans for 2025?

Answer : Although our net profit has increased by 40 Million Baht, our capital has decreased. The reduction in capital is due to the adjustment of credit terms from 30 days to 60 days. Additionally, the rapid strengthening of the Thai Baht has impacted our assets, causing a decrease in their valuation. The exchange rate fluctuations have affected our capital, and the lack of clarity on exchange rate movements means that the Company is unable to take any action. Therefore, it is necessary to prepare for exchange rate risks in 2025. We also have plans to invest 50,000,000 Baht in environmental projects. This is the reason behind the decision to reduce the dividend payout to 8 Baht, down from the previous 10 Baht.

As there was no question and comment from shareholders, the Chairman asked the meeting to vote on this Agenda. Agenda 6, to approve the distribution of profit and de clarification of dividend, shareholders please mark either the "Agree", "Against", or "Abstain".

Question from Mr. Parinya Tienworn (Shareholder registration no. 6016682838)

Where will the company generate sales to compensate for the loss of printer sales?

Answer : As reported in the 2025 business forecast, the Printer business is expected to generate an increase in revenue to be 11,500 Million Baht. This will come from customer sales promotion activities, including the Lucida printer model, which is a higher-priced model expected to see an increase in sales as projected. Therefore, we estimate that revenue from this business will rise. Additionally, to provide further information, the global value of the printer business in 2023 was 49,300 Million USD, and it is expected to grow to 75,000 Million USD by 2032.

Furthermore, in the technologies related to printers such as improved resolution, wireless connectivity, faster printing speeds, and IOT system compatibility these advancements will drive increased demand for printers. Additionally, improving production efficiency will reduce costs, and we will strive to keep up with these technologies. This includes focusing on customer engagement to increase sales in this business.
